

SOUTH DAKOTA MINES
An engineering, science and technology university

Unlocking Your Innovation: How the NSF I-Corps Program Can Empower Your Technical Research for Market Impact

Dr. Micah Lande & Beth Lambeth

Tuesday, September 17

11 AM, CM 266

Panelists

Dr. Prasoon Diwakar

ME student Max Schuh

The NSF I-Corps program helps STEM faculty, staff, and students extend their technical research beyond the lab through a multi-week bootcamp focused on customer discovery and entrepreneurship, enabling them to validate market needs and explore commercialization opportunities. Learn about this novel opportunity and hear from colleagues who have benefitted from the program.

South Dakota Mines is part of the Great Plains I-Corps Hub.
